SEO Ranking Growth Plan

nyccleantinc.com · New York Commercial Clean Team Inc. · Prepared November 1, 2026 · Data: Semrush (US, desktop, Oct 31, 2026) and Site Audit (Oct 21, 2026)

ORGANIC KEYWORDS	ORGANIC TRAFFIC / MO	AUTHORITY SCORE	SITE HEALTH	AI MENTIONS
121	**183**	**9**	**95%**	**0**
−27% vs. last month	+58% vs. last month	Low	0 errors, 4 warnings	ChatGPT, Gemini, AI Overviews

Executive summary

- **About 80% of organic clicks come from people searching our company name.** Almost no traffic comes from people searching for the service itself, such as “commercial cleaning NYC.”
- **Most of our money keywords are stuck on page 2 (positions 9–20).** Moving them into the top 5 is the fastest way to win new leads.
- **The biggest thing holding us back is that several of our pages compete for the same keywords.** We have 3 office cleaning pages, 3 day porter pages, 3 window cleaning pages, and Google shows both the www and non-www versions of our site. Google keeps switching between them, which pushes all of them down.
- **58 pages in our sitemap aren't linked from anywhere else on the site**, including our borough pages. Because nothing points to them, Google ranks the homepage for those searches instead.
- **Our Authority Score is 9.** That’s low for the NYC market. We need real local links, citations, and reviews.

> **Note on the Semrush home dashboard:** it shows “4 keywords, −96.83%.” That’s not a crash. The project only tracks 4 keywords. The full domain ranks for 121 in the US. Action: add the target keywords below to Position Tracking.

1. Quick wins: keywords just off page 1

We already rank for these. Moving them into the top 5 should produce new lead traffic within weeks.

Keyword	Current position	Searches / mo	Difficulty	Page that should rank
commercial cleaning new york	10	390	33	Homepage
commercial cleaning services new york	9	260	43	Homepage
commercial office cleaning nyc	16	170	28	Office cleaning page
nyc commercial cleaning	10	140	31	Homepage
new york commercial janitorial services	6 / 12	140	31	Homepage
commercial cleaning new york ny	12	140	23	Homepage
restaurant cleaning services nyc	26	140	4	/industries/food
commercial cleaning new york city	11	110	31	Homepage
commercial cleaning brooklyn	18	110	9	Brooklyn page
commercial cleaning services manhattan	14	70	31	Manhattan page
commercial cleaning staten island	10	70	17	Staten Island page
office cleaning queens	6 / 20	70	4	Queens page
cleaning for retail spaces	18	40	11	/industries/retail

Bigger keywords to go after next

Keyword	Current position	Searches / mo	Difficulty
office cleaning service new york	41	480	20
building cleaning for multi-tenant spaces	42	480	0
office cleaning new york city	56	320	20
office cleaning in nyc	36	140	25
commercial cleaning companies nyc	21	170	45

These keywords have low difficulty (mostly 0–25), so a single strong, well-linked office cleaning page could reach page 1 for all of them.

2. Merge pages that compete for the same keywords PRIORITY 1

Semrush shows several of our pages ranking for the same searches. Google splits ranking strength between them, so each one ranks lower than a single page would.

Service	Competing URLs	Keep (recommended)
Office cleaning	`/services/office-cleaning` `/services/recurring/office-cleaning` `/commercial-office-cleaning-nyc`	`/services/recurring/office-cleaning`
Day porter	`/services/day-porter-services` `/services/recurring/day-porter-services` `/day-porter-services-nyc`	`/services/recurring/day-porter-services`
Window cleaning	`/services/surface/window-cleaning` `/commercial-window-cleaning-nyc` `/commercial-window-cleaning-queens`	`/services/surface/window-cleaning`
Domain	`www.nyccleantinc.com` and `nyccleantinc.com` both appear in Google	Non-www (most rankings already use it)

Developer action:

- 301-redirect each duplicate to the page we're keeping.
- Force the non-www version of every URL.
- Update internal links and the sitemap to use only the final URLs.
- Add self-referencing canonical tags.

Merge any unique text from the duplicate pages into the page we're keeping before redirecting.

3. Link the borough and service-area pages PRIORITY 1

The Site Audit found **58 pages in our sitemap that no other page on the site links to**, and **21 pages with only one internal link**. Our borough pages rank #63–#77 while the homepage ranks for those searches instead.

- Add a **Service Areas** menu and footer block linking to Manhattan, Brooklyn, Queens, Bronx, and Staten Island pages.
- From every service page, link to the matching borough pages with descriptive link text, e.g. "commercial cleaning in Brooklyn."
- From every borough page, link back to each service page and to `/industries/*` pages.
- Add links from the homepage to the five most important service pages and five borough pages.

4. On-page and content fixes PRIORITY 2

Site Audit finding	Pages	Fix
Page title too long	16	Keep under 60 characters with the keyword first, e.g. “Commercial Cleaning Services NYC | NY Commercial Clean Team”
Little text compared to page code	29	Add real content (see below) and trim unnecessary code
Very little text	3	Expand to 600–900 words
Need content optimization	3	Follow Semrush’s content recommendations
Broken links to other websites	2	Fix or remove them
No llms.txt file	—	Add an llms.txt file (helps AI search tools read the site)
2 subdomains without HSTS	—	Turn on HSTS (a server security setting)

What every service and borough page should include

- An H1 heading and title with the main keyword, e.g. “Commercial Cleaning in Brooklyn.”
- Neighborhoods served (e.g. DUMBO, Williamsburg, Park Slope) and types of buildings (offices, medical, retail, restaurants, multi-tenant).
- Our process and cleaning checklist, how often we clean, and our insurance, bonding, and green-cleaning credentials.
- Real job photos, a client testimonial, and a clear call to action for a quote.
- A 4–6 question FAQ section marked up with FAQ schema (code that tells search engines it’s an FAQ). Add LocalBusiness schema to the homepage and contact page.

5. Authority and local signals PRIORITY 2

> Semrush shows about 2,000 linking domains but an Authority Score of only 9. That usually means many of those links are low quality. Run Semrush's **Backlink Audit** and disavow obvious spam before building new links.

- **Google Business Profile:** fill out every service category and service area. Post weekly, upload job photos, and ask every satisfied client for a review.
- **Citations** (listings with the same company name, address, and phone everywhere): Yelp, BBB, Angi, Thumbtack, Bing Places, Apple Business Connect, and local Chambers of Commerce in Queens, Brooklyn, and Staten Island.
- **Industry links:** BOMA New York, ISSA, NYC property-management and facility-management directories, and supplier or partner pages.
- **Local PR:** case studies with named clients (with permission), sponsorships, and neighborhood business associations (BIDs).

Top organic competitors (by keyword overlap)

Competitor	Overlap	Keywords	Traffic / mo
4starcleaning.com	19%	810	2,600
gogleem.com	29%	206	1,400
clean2clean.com	11%	788	1,400
impeccablecleaningnyc.com	21%	520	1,100
janitorialnyc.com	22%	189	889
elevatecommercialcare.com	32%	217	219
solutionsnewyork.com	37%	48	208
nyccleantinc.com (us)	—	**121**	**183**

Next step: run Semrush's **Keyword Gap** and **Backlink Gap** against the top 5 to see the pages and links they have that we don't.

6. Getting mentioned in AI search PRIORITY 3

We currently get 0 mentions in ChatGPT, Google AI Overviews, AI Mode, and Gemini. To start getting cited:

- Add clear "Who we serve / Where we serve / What's included" sections, written so AI tools can quote them directly.
- Add FAQ and LocalBusiness schema, plus an llms.txt file.

- Get mentioned on the directories, review sites, and trade sites that AI tools pull from, as listed in section 5.

90-day action plan

When	Action	Owner
Weeks 1–2	Merge duplicate pages with 301 redirects and force non-www. Fix broken links. Add target keywords to Position Tracking.	Developer / Marketing
Weeks 2–3	Add Service Areas menu and footer, and link service pages to borough pages.	Developer
Weeks 3–6	Rewrite titles and expand homepage, office cleaning, and 5 borough pages to 600–900 words with FAQs and schema.	Marketing / Content
Weeks 4–8	Backlink Audit and disavow spam. Clean up Google Business Profile and directory listings. Start a review-request routine.	Marketing
Weeks 6–12	Run Keyword Gap and Backlink Gap. Build industry pages for medical, food, and retail. Do outreach to BOMA, ISSA, and BIDs.	Marketing
Monthly	Review Position Tracking, re-run Site Audit, and report keywords in the top 10 and form leads from organic search.	Marketing

How we'll measure success

- 8+ of the quick-win keywords in the top 5 within 90 days.
- Non-branded organic traffic up 3× from about 35/mo today.
- Authority Score above 15, and 25+ new Google reviews.
- Site Audit: 0 orphaned pages, and no duplicate pages competing for the same keyword.
